

Satellite Measurements across the DBO

PIs:

Karen Frey, Graduate School of Geography, Clark University

Lee Cooper, University of Maryland Center for Environmental Science

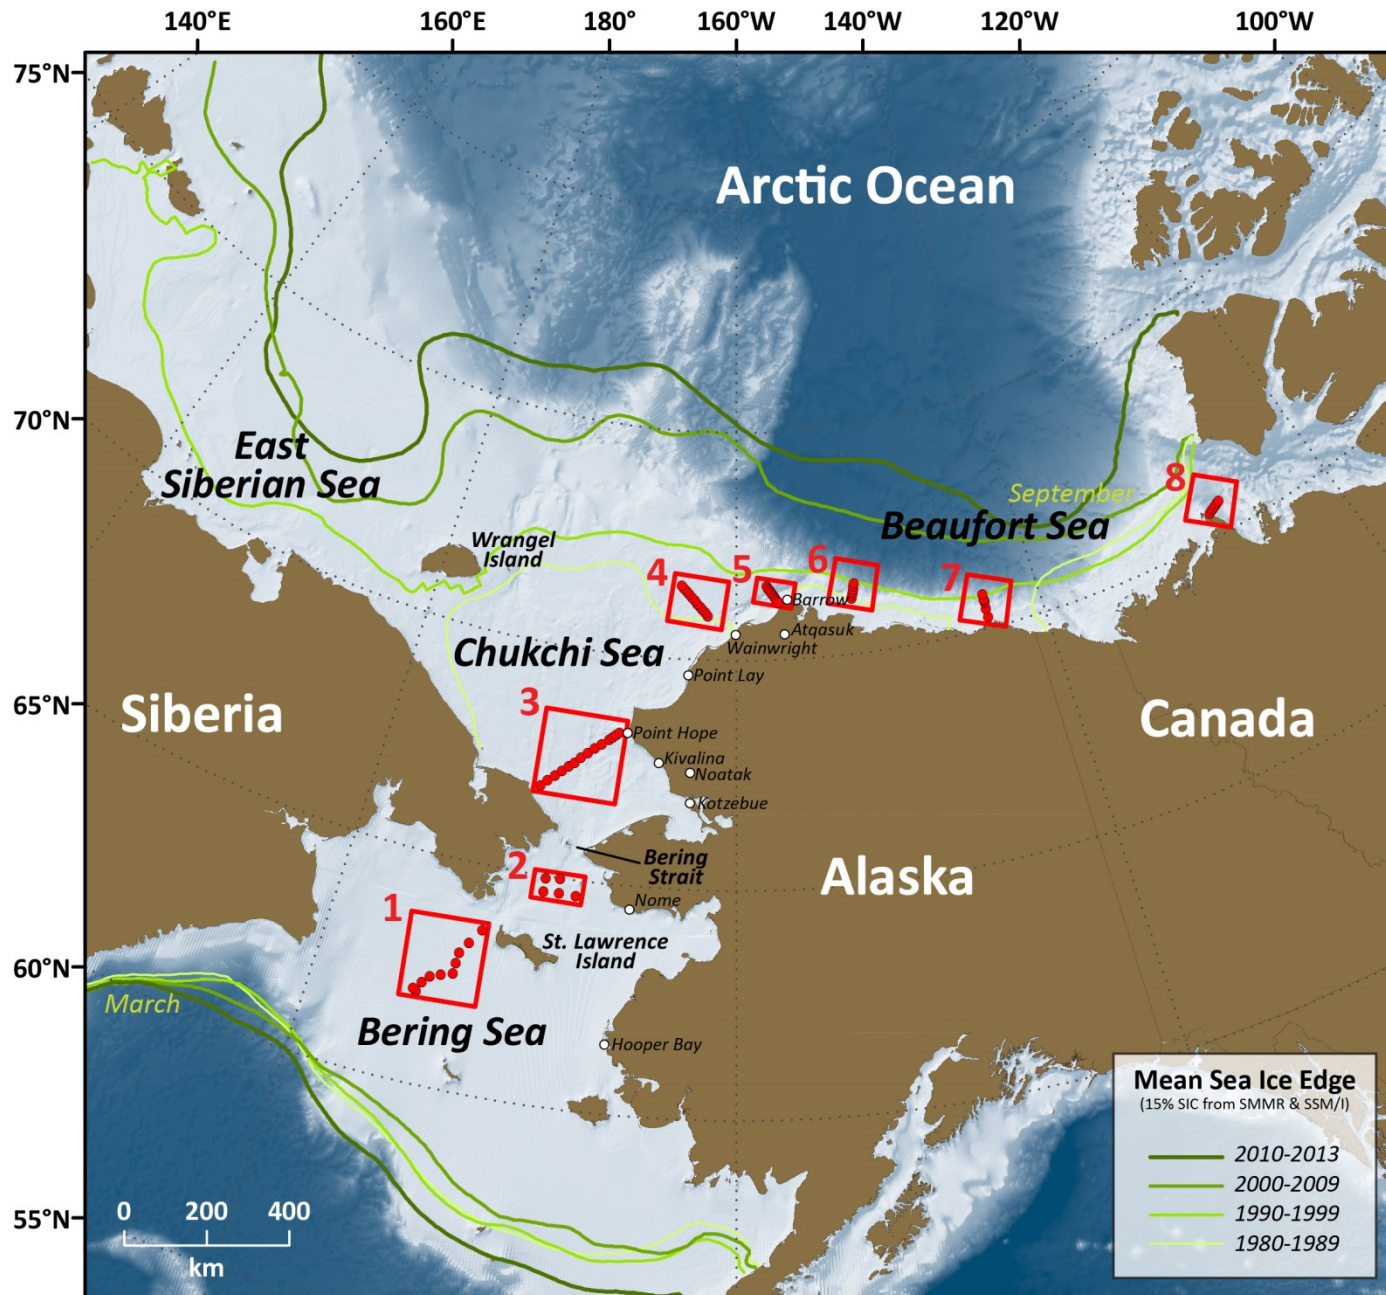

Jacqueline Grebmeier, University of Maryland Center for Environmental Science

Graduate Students:

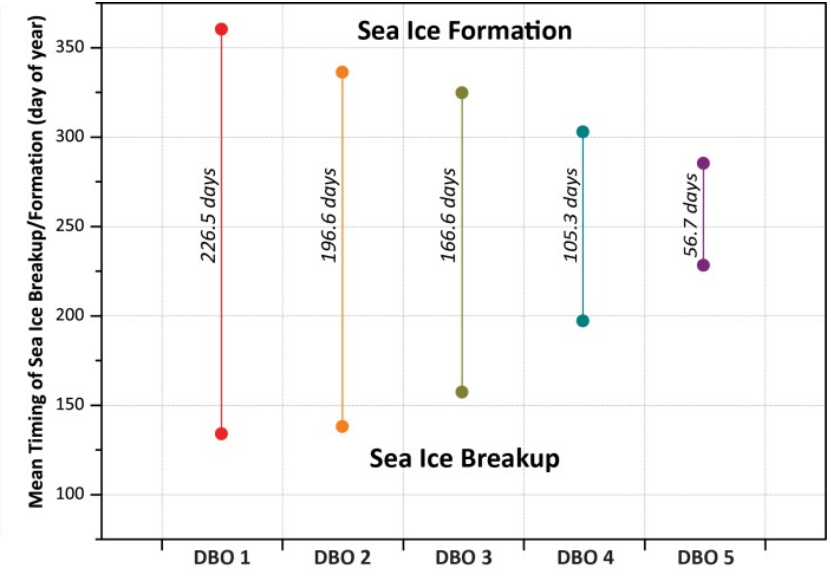

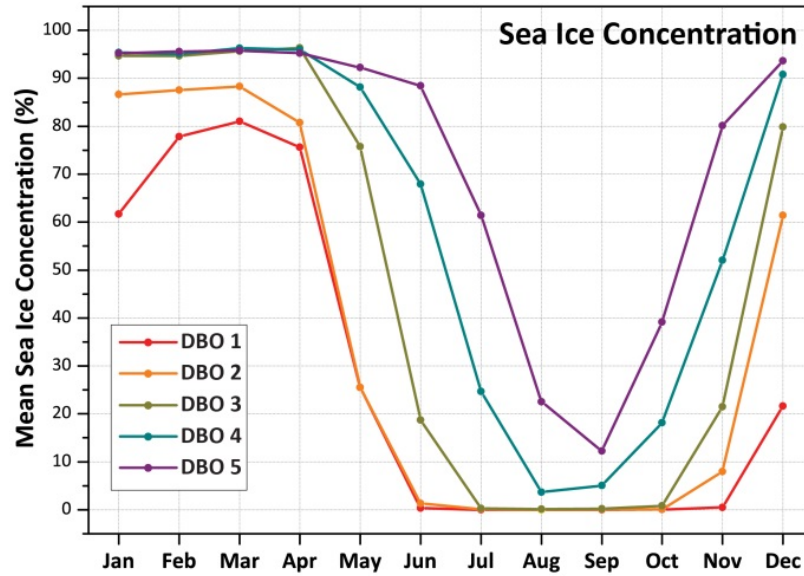

Kristen Shake (Ph.D. Candidate), Graduate School of Geography, Clark University

Melishia Santiago (Ph.D. Candidate), Graduate School of Geography, Clark University

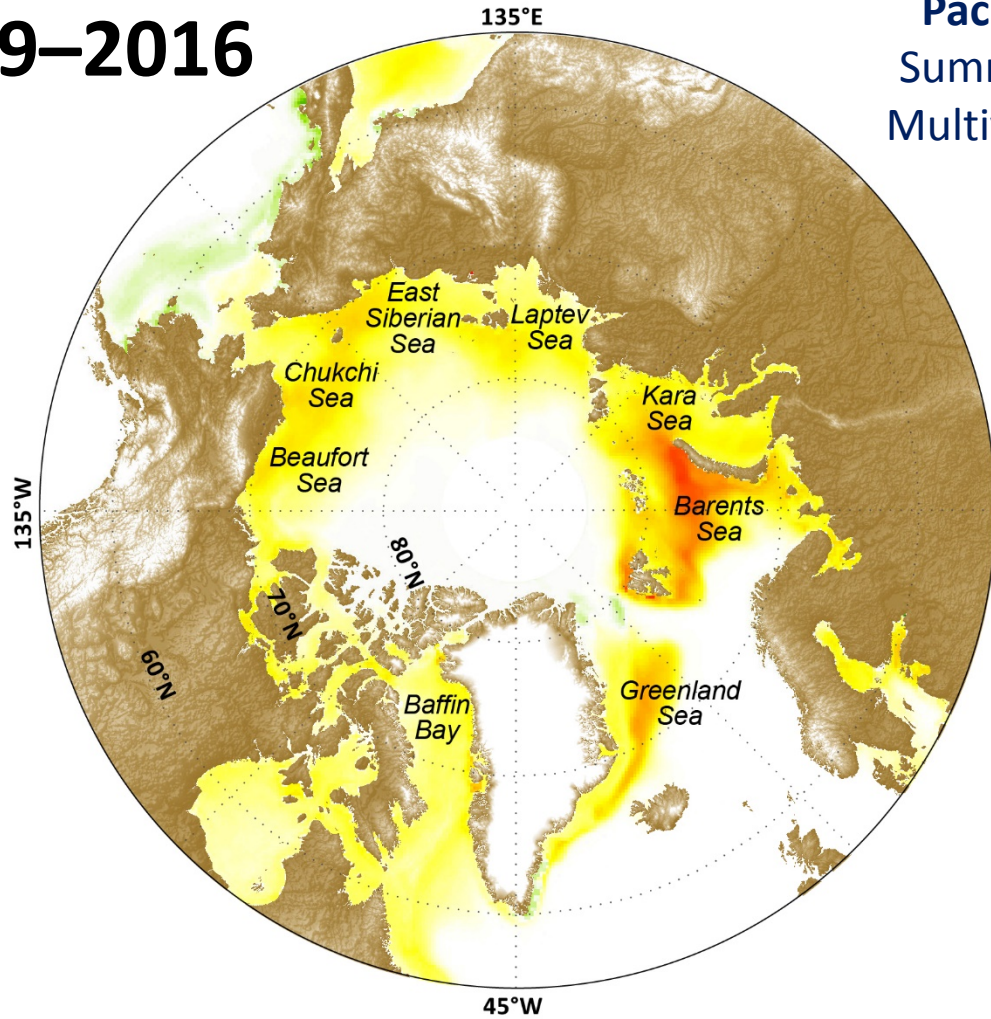

**DBO Workshop
NOAA/PMEL, Seattle WA
8 November 2017**

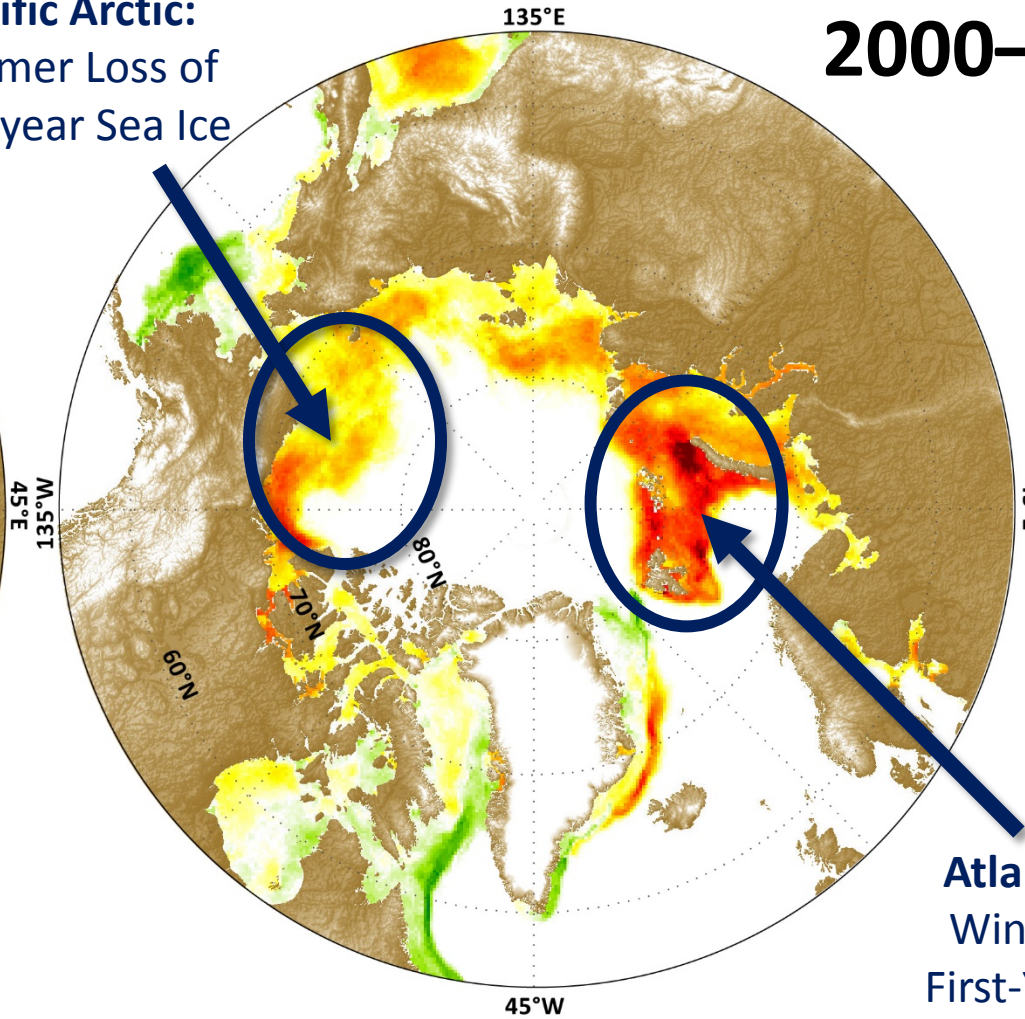

Monthly Mean DBO Climatologies (DBO 1–5)

1979–2016

Pacific Arctic:
Summer Loss of
Multiyear Sea Ice

2000–2016

Atlantic Arctic:
Winter Loss of
First-Year Sea Ice

Trends in Annual Sea Ice Persistence (days/year)

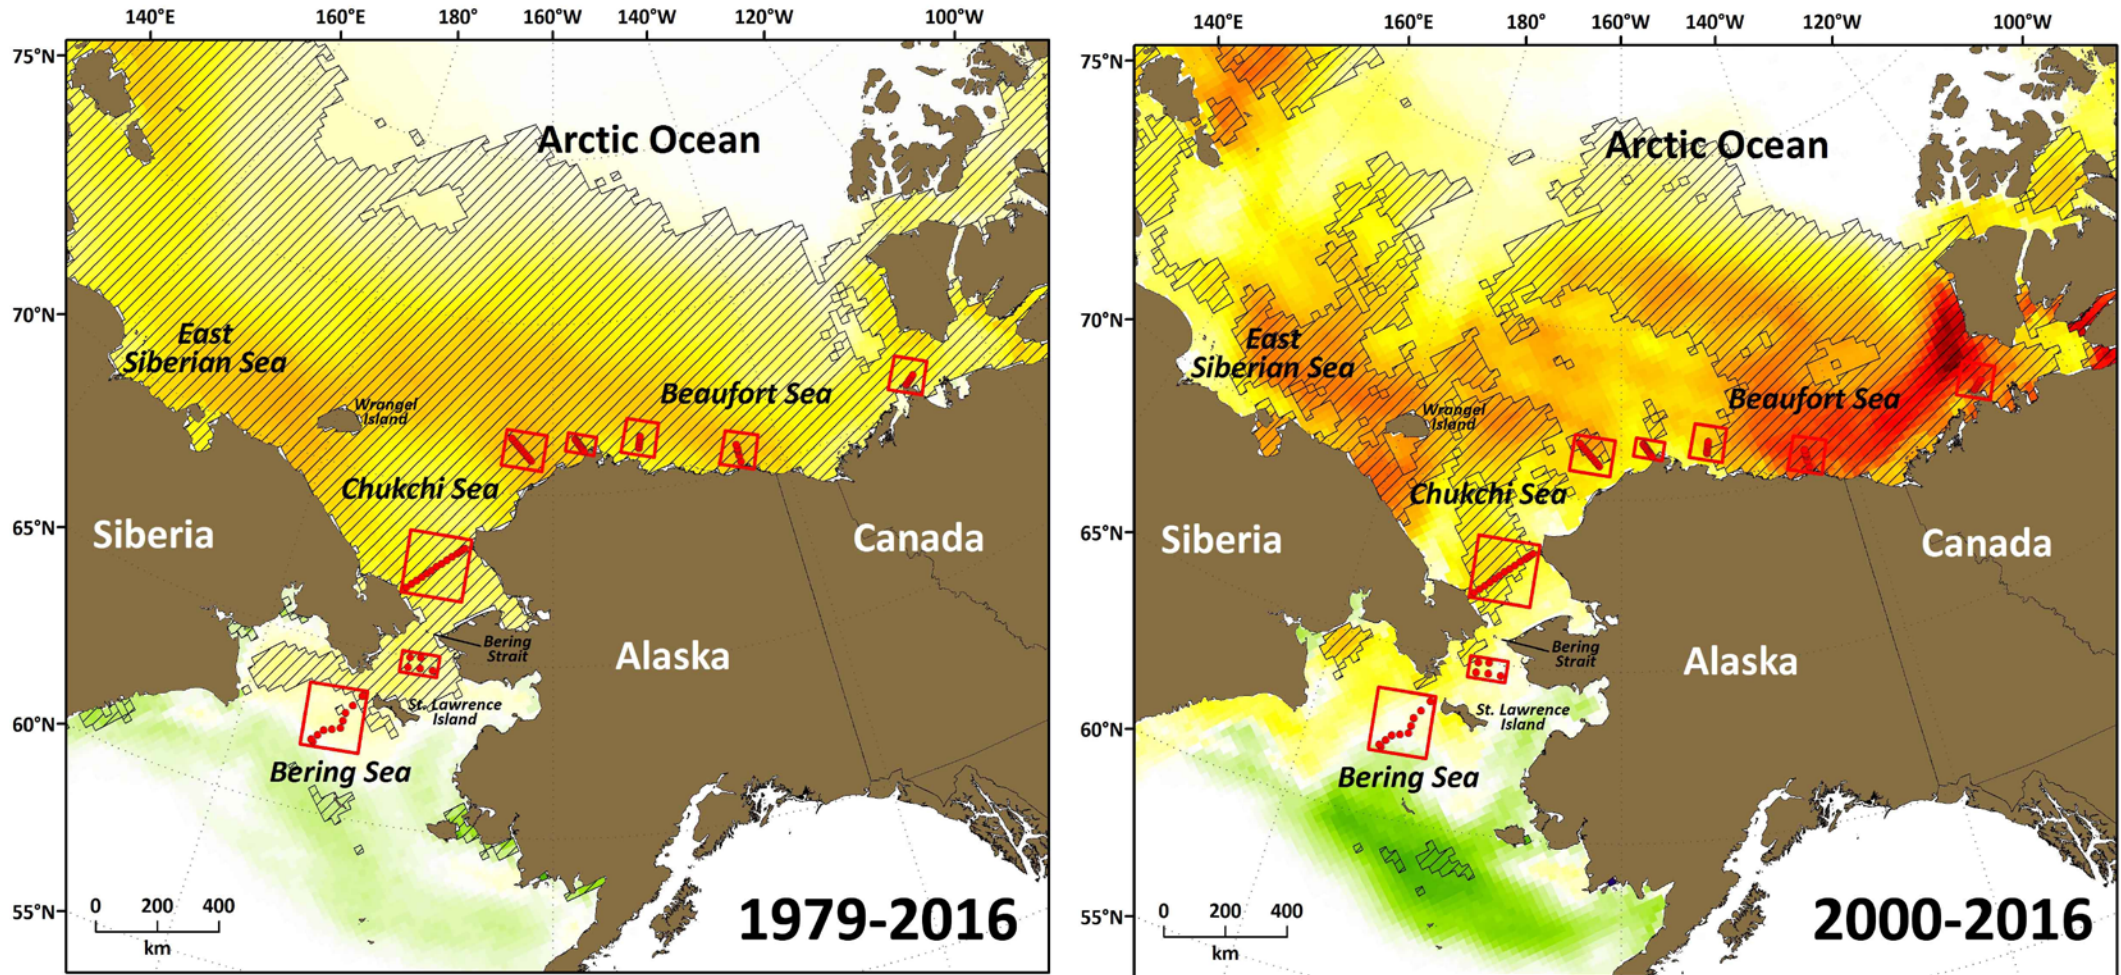

Based on SSMR and SSM/I satellite data

Trends in Annual Sea Ice Persistence (DBO 1–8)

Hatching indicates statistically significant trends (Mann-Kendall $p < 0.1$)

Trends in annual sea ice persistence have accelerated since 2000

Trends in Annual Sea Ice Persistence (days/year)

Trends in Annual Sea Ice Persistence (DBO 1–8)

Trends in annual sea ice persistence have accelerated since 2000

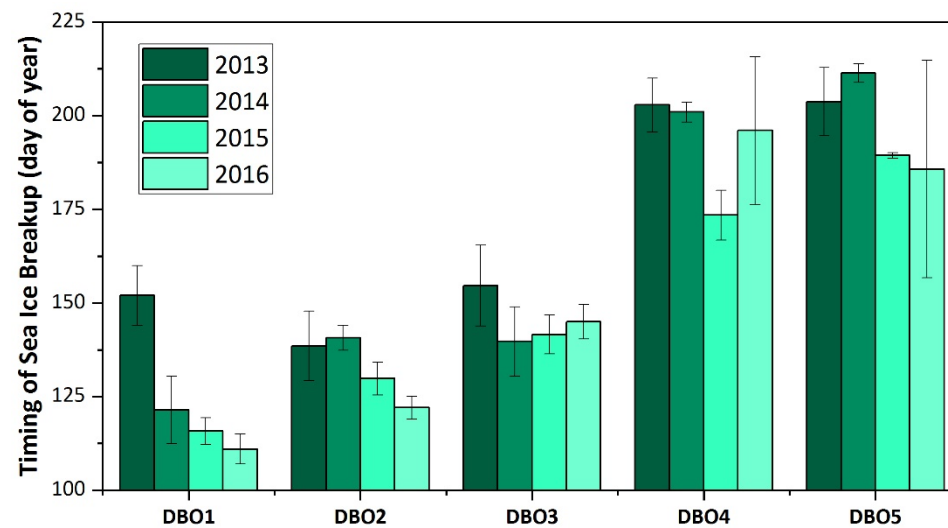

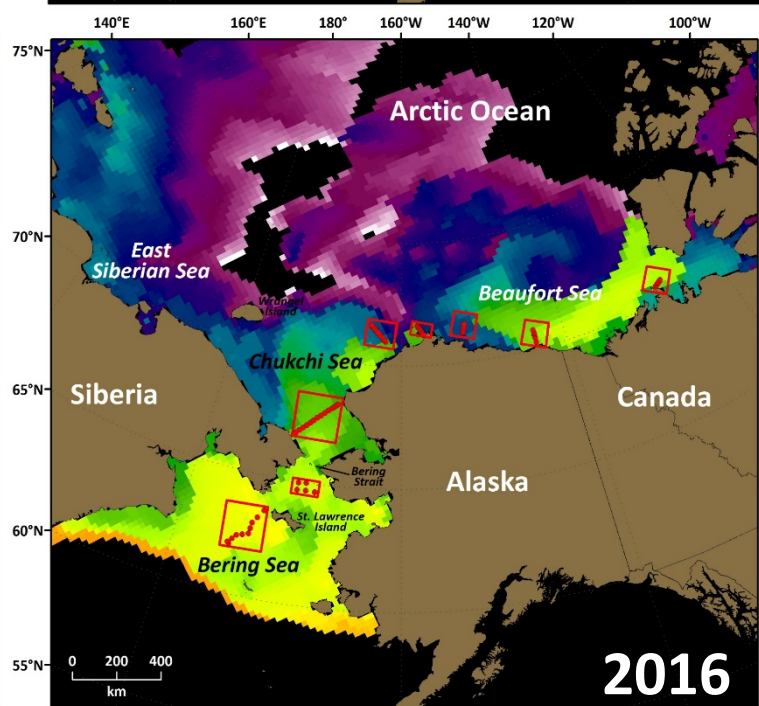

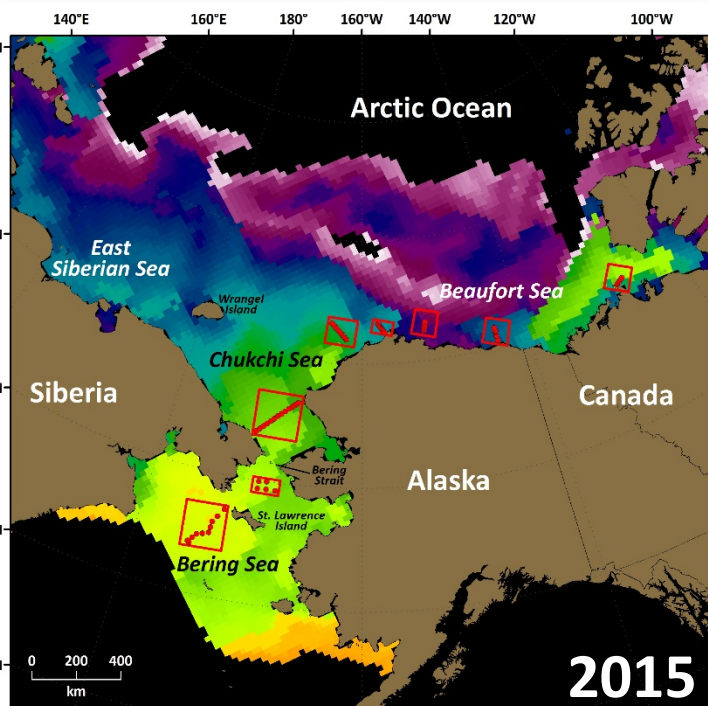

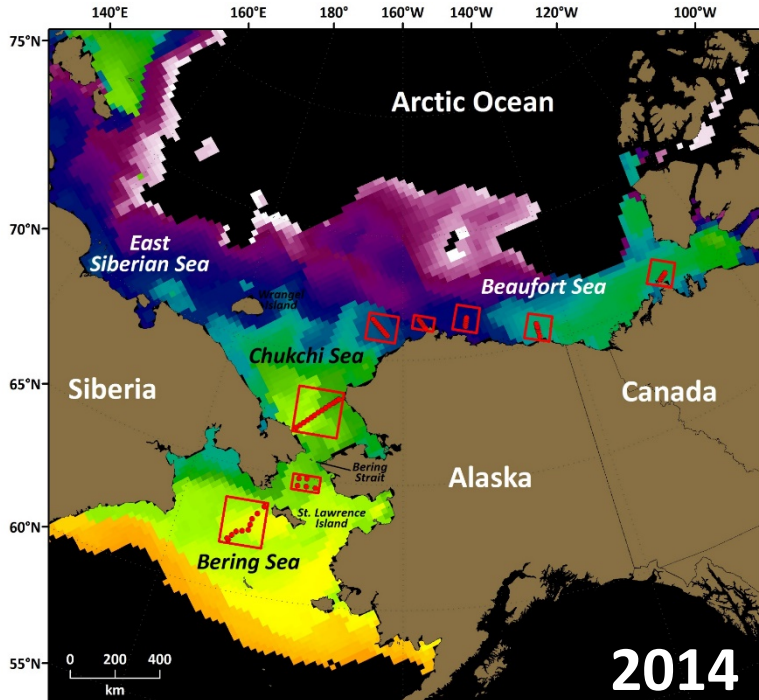

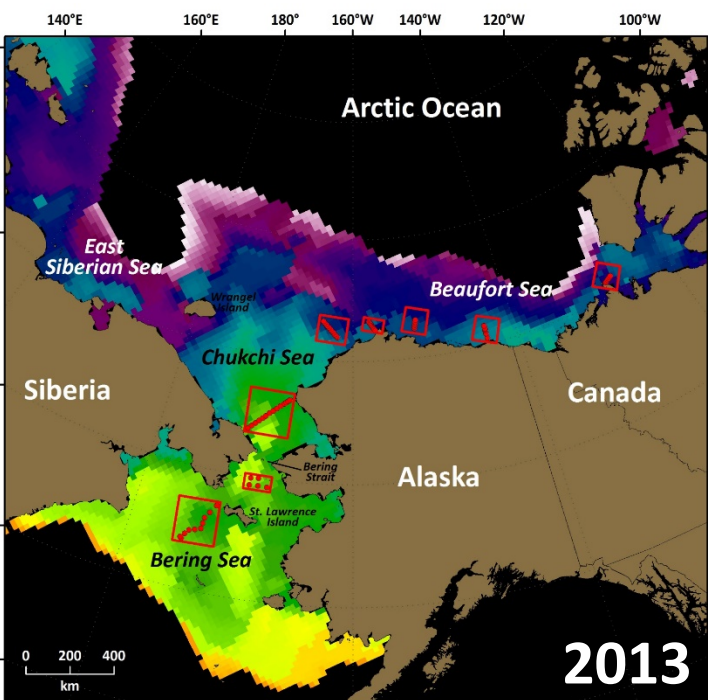

Error bars represent standard errors of the linear trends

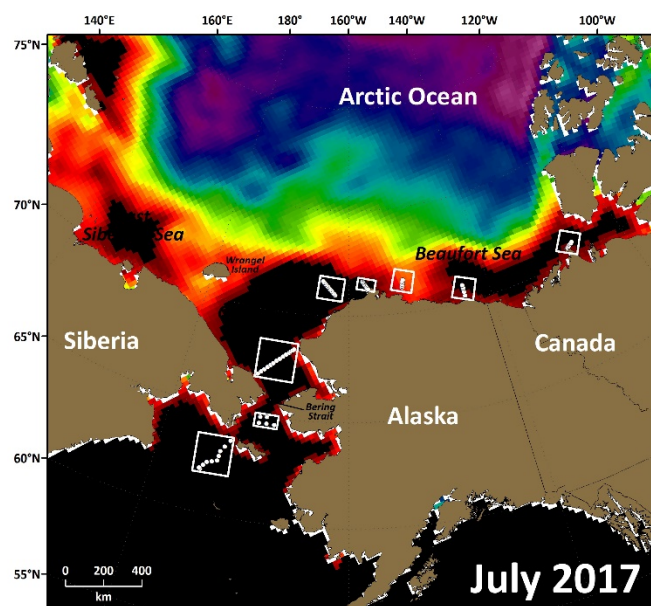

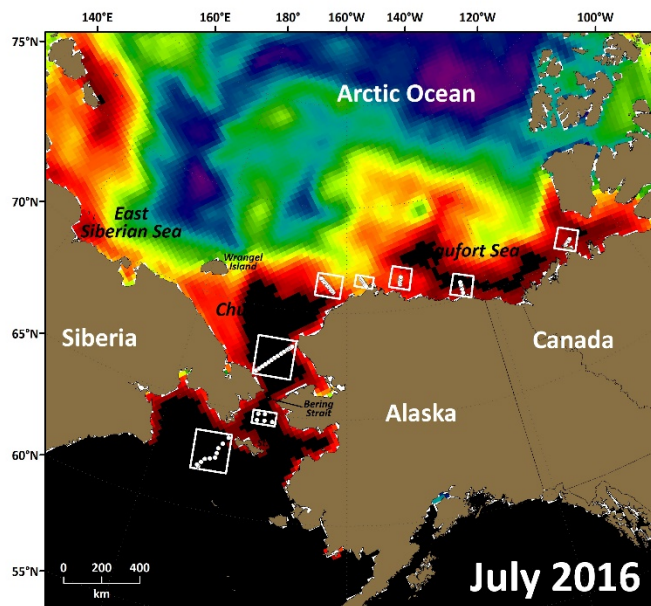

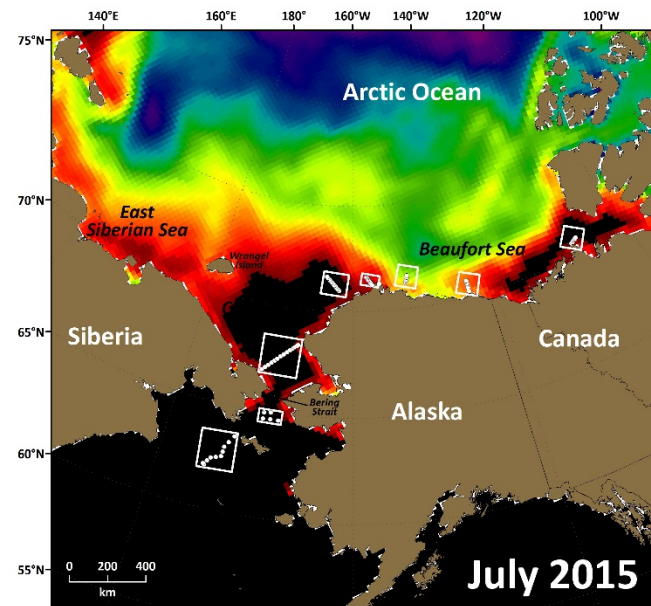

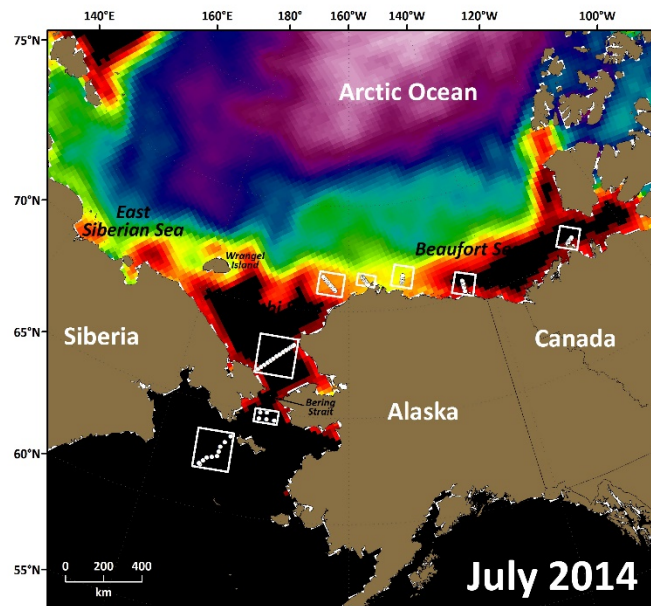

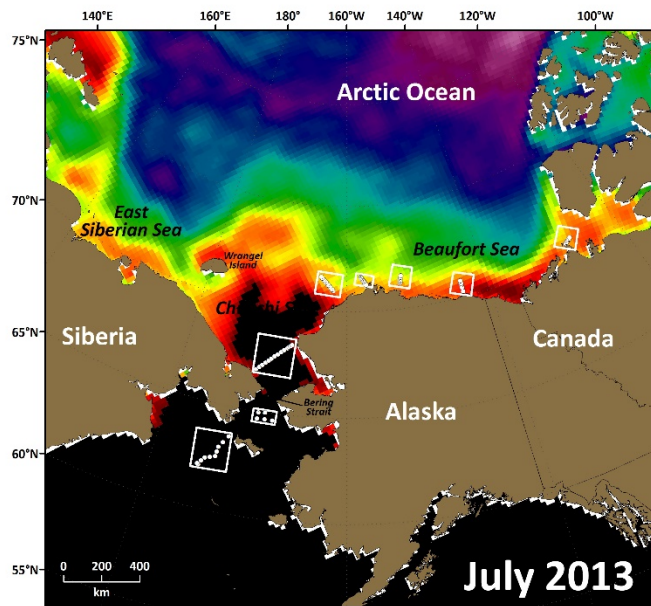

Timing of Sea Ice Breakup 2013-2016

based on SSM/I satellite data

Timing of Sea Ice Breakup

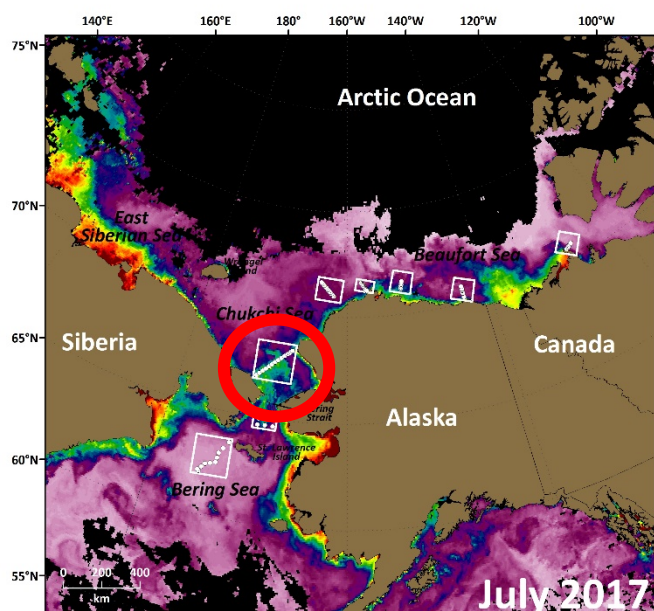

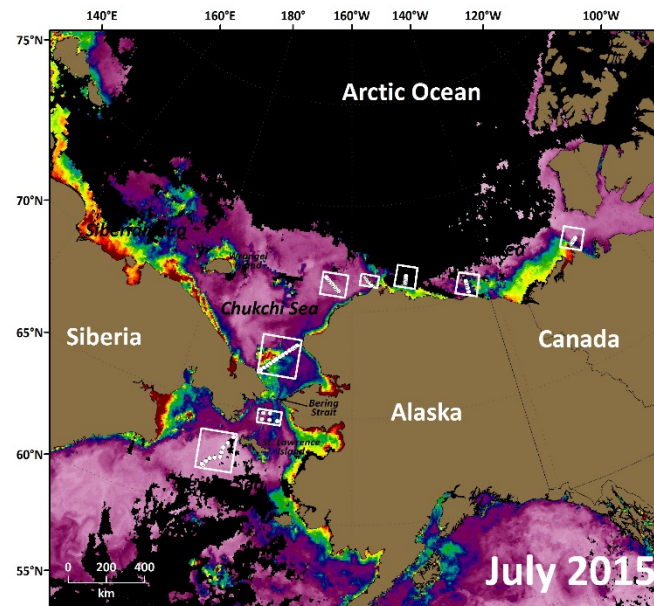

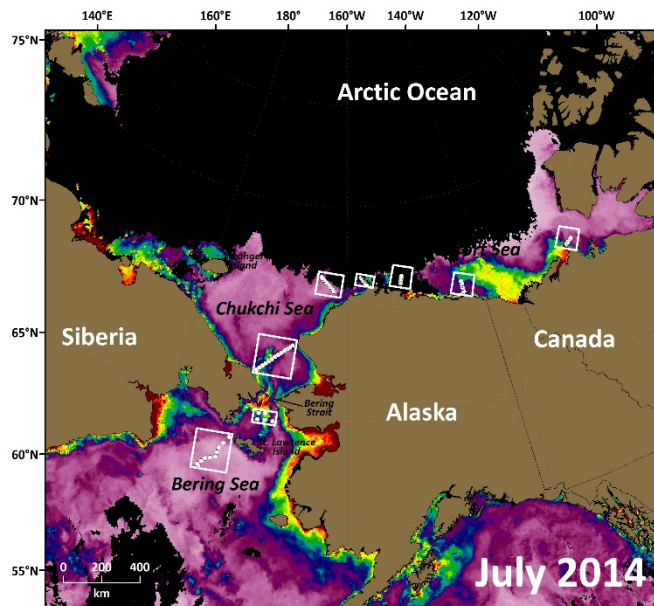

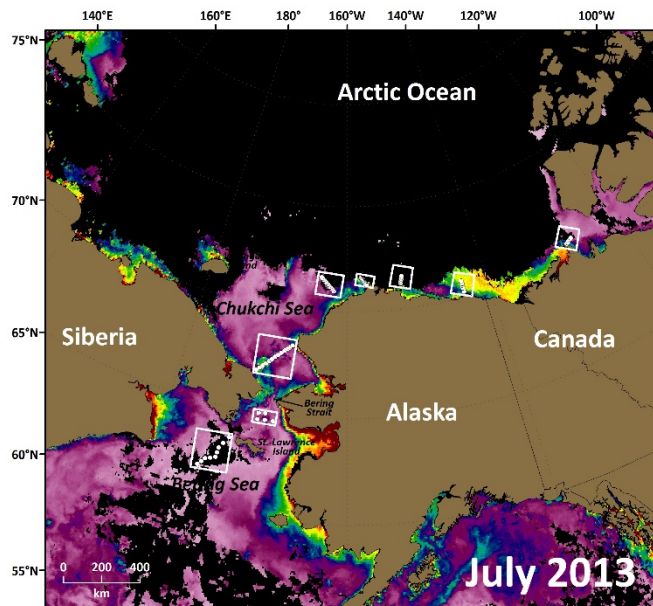

Sea Ice Concentration (%)

July Sea Ice Concentration (SSM/I)
 2013-2017 (corresponding to the NSF/AON Laurier cruises)
 High interannual variability, but less ice in 2015 and 2016

Chlorophyll-*a* Concentrations (MODIS-Aqua)

2013-2017 (corresponding to the NSF/AON Laurier cruises)
Most extensive bloom for DBO3 was in 2017

Monthly and Interannual Variability of Chl-a

based on MODIS-Aqua satellite data

DBO1

● 2013 ● 2014 ● 2015 ● 2016

DBO2

● 2013 ● 2014 ● 2015 ● 2016

DBO3

● 2013 ● 2014 ● 2015 ● 2016

DBO4

● 2013 ● 2014 ● 2015 ● 2016

DBO5

● 2013 ● 2014 ● 2015 ● 2016

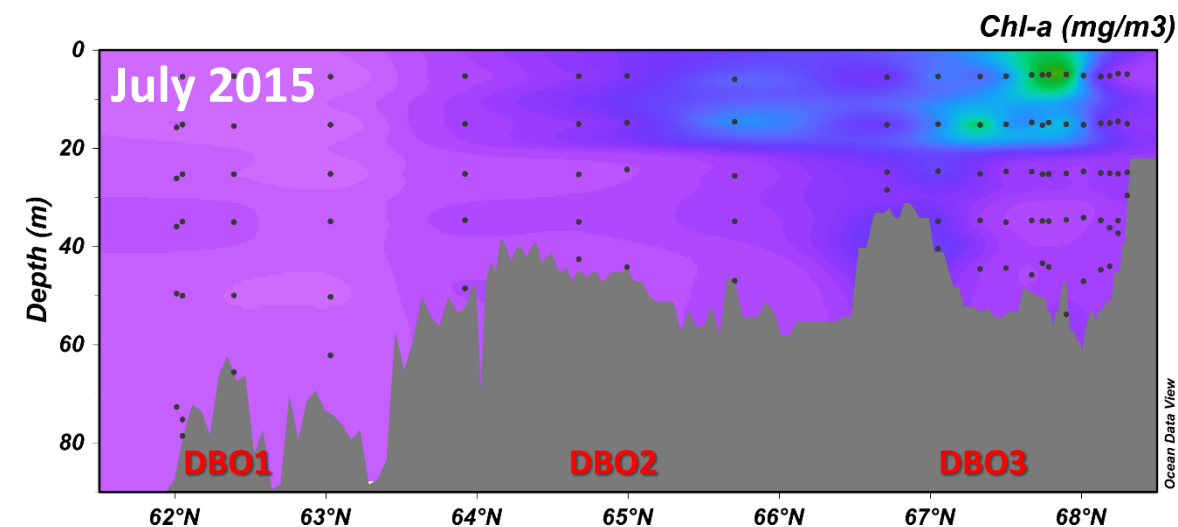

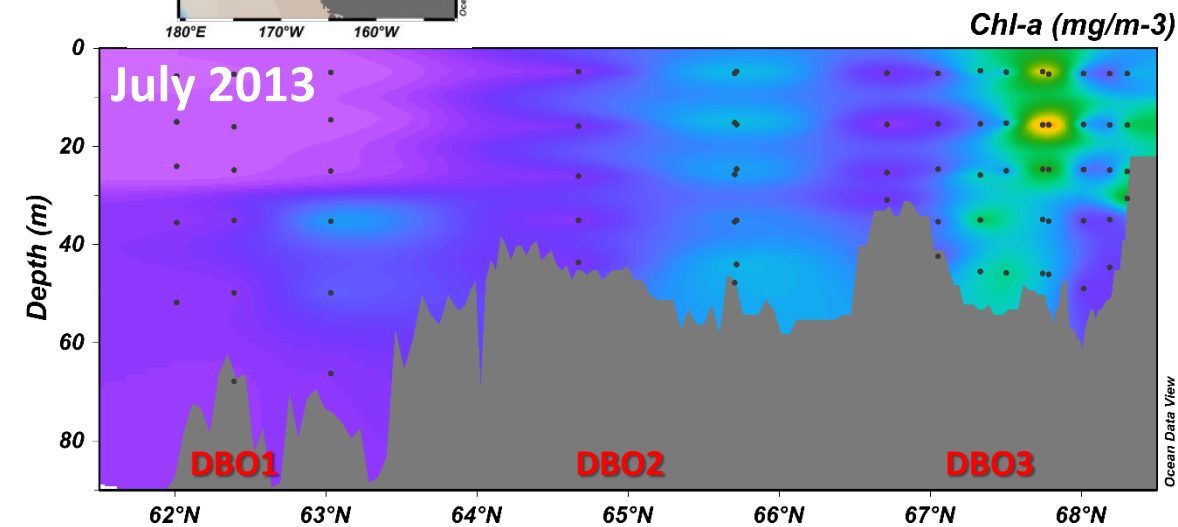

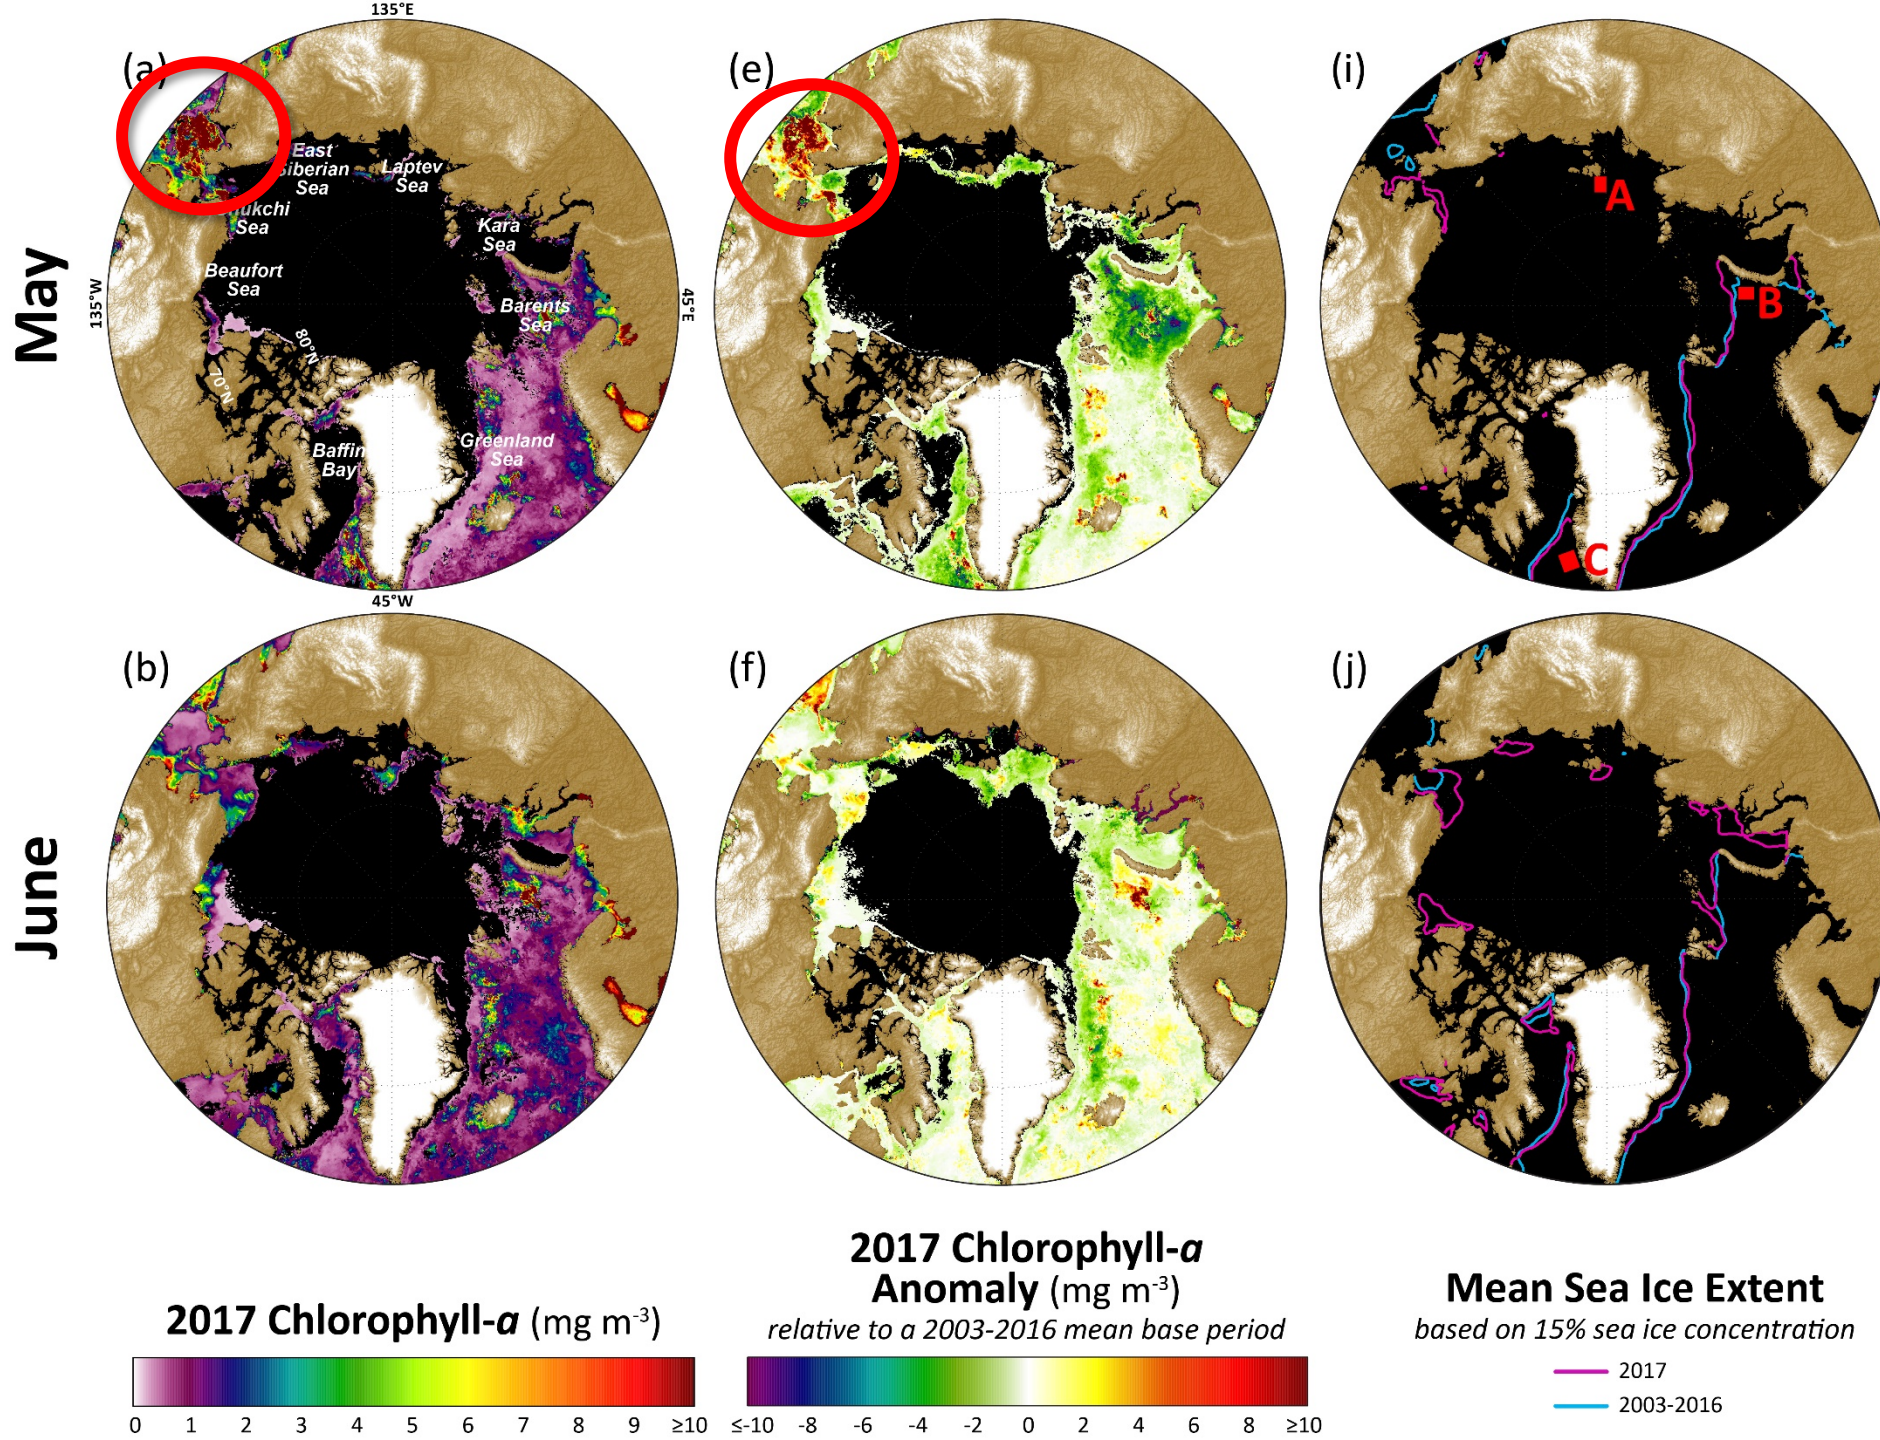

Field Observations of Chl-a (*DBO1, DBO2, DBO3*)

Large interannual variability:

2013 and 2015 chl-a concentrations indicate lower production near DBO3 in July

2014 and 2016 chl-a concentrations indicate higher production near DBO3 in July

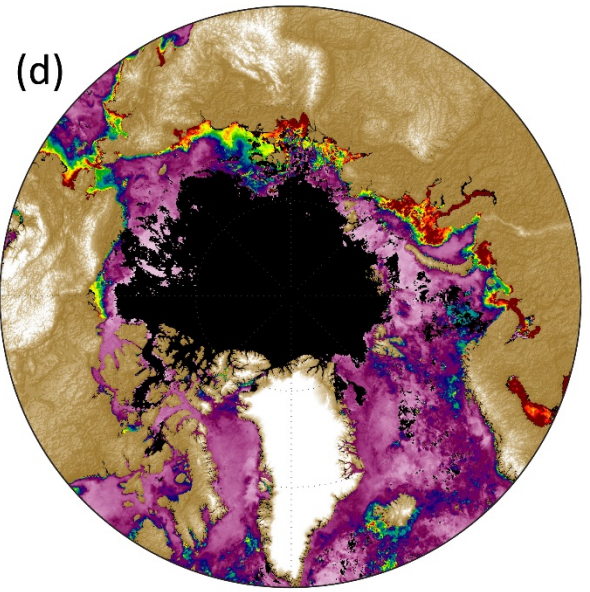

July

August

2017 Chlorophyll- a (mg m^{-3})

2017 Chlorophyll- a
Anomaly (mg m^{-3})

relative to a 2003-2016 mean base period

Mean Sea Ice Extent

based on 15% sea ice concentration
