

PO Breakout 1

Sci Highlights from meeting:

1) Winter water changes,

- where, drivers, impacts

Salinity Story for the DBO region

2) Nutrient Story

DBO GAP

- nutrient sensors on moorings

3) Warming Story

- What happened to the blob??, impacts?

4) *Source waters for the DBO region – is it changing?*

Not DBO only?

PO Breakout 2

New DBO THINGS

1) New DBO Site around PACO line

- 0.5Sv of PW heading west from Barrow Canyon
- lots of prior obs (Bob, Phyllis, ...)
- en route for many ships ..

2) Nutrient measurements on moorings

3) Data/communication

PO Breakout 3

Data debate and communications

- Problems:*
- ADC don't want NOAA data
 - NCEI won't take NOAA format
 - data spread on many sites, hard to pull together

BASIC Solution?

- list of data bases on DBO website (SAS does this)
- List of observational products on a website
- List of model tools and DBO friendly modelers
- DBO email list (Jackie's cruise list awesome)

Some project office to pull all this together onto website and keep it up to date
